

I'm using WP Fastest Cache

Exclude COOKIES

In order for HandL UTM Grabber to work more efficiently, you may want to whitelist some of the COOKIES our plugin uses so they are not cached.

You can do so very easily following the steps

1. Go to the settings for the WP Fastest Cache plugin
2. Click on the "Exclude" tab.
3. Click the "Add New Rule" button associated with "Exclude Cookies"
4. Type the cookie name you use from [Native WP Shortcodes](#) in the text box.
5. Click "Save".

The screenshot shows the WP Fastest Cache Options page with the 'Exclude' tab selected. The 'Exclude Cookies' section is active, and the 'Add New Rule' button is clicked, opening the 'Exclude Page Wizard' dialog. The wizard shows 'If Cookie' set to 'Contains' and the text 'utm_source' entered in the input field. The 'Save' button is highlighted in green.
