

# Add HandL UTM Grabber Support in Borlabs v3

Since version 3, Borlabs has updated its user interface and the method for adding cookie exceptions. Here, we will explain how you can do this in version 3.

Click on "Services" under "Consent Management" in Borlabs as shown here.

The screenshot displays the Borlabs Cookie management dashboard. The top navigation bar includes 'Dashboard', 'Settings', 'Dialog & Widget', 'Consent Management', 'Blockers', 'Scanner', 'Library', and 'System'. The 'Consent Management' menu is open, showing options like 'Services', 'Service Groups', 'IAB TCF', 'Manage Vendors', 'Settings', 'Providers', and 'Consent Logs'. The 'Services' option is selected, leading to the 'Edit: HandL UTM' page. A notification states 'Please activate your license key first. Click here to enter your license key.' Below this, a green message says 'Saved successfully.' The main content area is titled 'Service Settings' and contains the following fields:

ID	handl-utm-grabber
Shortcode	[borlabs-cookie id="handl-utm-grabber" type="servic
Opt-out Shortcode	[borlabs-cookie id="handl-utm-grabber" type="btn-sv
Status	<input checked="" type="checkbox"/>
Position	1
Language	en

At the bottom, there is a 'Synchronize Configuration' button and a red warning message: 'Your license has expired. This feature is not available with an expired license. Click here to log into your account and purchase a license renewal.'

Fill out the form like this

ID: handl-utm-grabber (this is very crucial make sure you use this verbatim)

Status: On

Position: 1

Language: en

Name HandL UTM Grabber

Description HandL UTM Grabber is a lead tracking and attribution plugin for WordPress

Service Group Marketing

It will look like this after saving.

### Service Settings

ID	<input type="text" value="handl-utm-grabber"/>	
Shortcode	<input type="text" value='[borlabs-cookie id="handl-utm-grabber" type="servic'/>	
Opt-out Shortcode	<input type="text" value='[borlabs-cookie id="handl-utm-grabber" type="btn-sv'/>	
Status	<input checked="" type="checkbox"/>	
Position	<input type="text" value="1"/>	
Language	en	
Synchronize Configuration		
Synchronize Translation		

### Service Information

Name	<input type="text" value="HandL UTM Grabber"/>	
Description	<input type="text" value="HandL UTM Grabber is a lead tracking and attribution plugin for WordPress"/>	

Fortunately, you can use a wildcard to input cookie names, making this step straightforward.

Please visit this page to retrieve a list of the cookies used by our plugin [Native WP Shortcodes](#).

Name	Hostname	Path	Lifetime	Purpose	Type	Description	#
utm_*	#	/	30	Tracking	HTTP		
first_*	#	/	30	Tracking	HTTP		
handl_*	#	/	30	Tracking	HTTP		
organic_so	#	/	30	Functional	HTTP		
gaclientid	#	/	30	Functional	HTTP		
user_agent	#	/	30	Functional	HTTP		
handlID	#	/	30	Functional	HTTP		

Save the settings, and voila!
