Capture UTMs in Brilliant Web-to-Lead for Salesforce

Edit your form and use the shortcode in the value field...

The screenshot shows a configuration panel for a form field named 'utm_campaign'. On the left, there are three checkboxes: 'Enabled' (checked), 'Required' (unchecked), and 'Delete' (unchecked). In the center, a dropdown menu is set to 'Text'. To the right of the dropdown, there are two input fields: 'Label:' (empty) and 'Value:' (containing the shortcode '[utm_campa:'). Further right is a large empty text area with a small icon in the bottom right corner. On the far right, a small box contains the number '15'.

See here for the list of shortcodes you can use [Native WP Shortcodes](#)
