

# ActiveCampaign hidden fields to appear in Elementor Form

By default Elementor doesn't list to map hidden fields in Elementor Form

You can't map your form field to a hidden field in Elementor...

The screenshot shows the 'Field Mapping' section of the Elementor form editor. It lists several form fields on the left and their corresponding mapped values in dropdown menus on the right. All dropdown menus are currently set to '- None -'. The fields listed are Email\*, First Name, Last Name, Phone, and Organization name. Below these is a 'Tags' field with an empty text input box. A note at the bottom states: 'Add as many tags as you want, comma separated.'

Field	Mapping
Email*	- None -
First Name	- None -
Last Name	- None -
Phone	- None -
Organization name	- None -
Tags	<input type="text"/>

*Add as many tags as you want, comma separated.*

You can resolve this in two ways

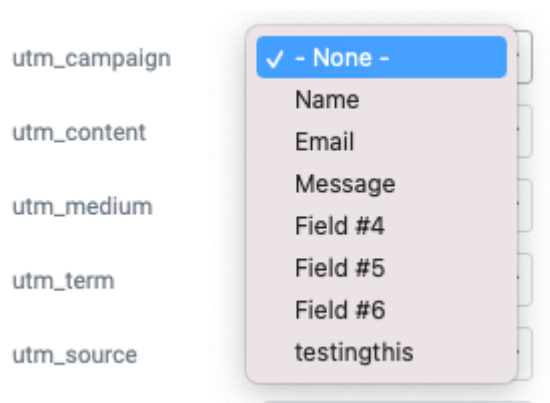

1. change all the custom parameters from ActiveCampaign to text from hidden. They will immediately will be mappable.
2. edit elementor code (single line edit) `wp-content/plugins/elementor-pro/modules/forms/classes/activecampaign-handler.php:131`. Add `hidden => 'text'` as shown in the image.

```

117
118 private function normalize_type( $type ) {
119     static $types = [
120         'text' => 'text',
121         'number' => 'number',
122         'address' => 'text',
123         'phone' => 'text',
124         'date' => 'text',
125         'url' => 'url',
126         'imageurl' => 'url',
127         'radio' => 'radio',
128         'dropdown' => 'select',
129         'birthday' => 'text',
130         'zip' => 'text',
131         'hidden' => 'text'
132     ];
133

```

After you are done either of those, you will be able to map the fields just fine (see the image)...
