

ActiveCampaign hidden fields to appear in Elementor Form

By default Elementor doesn't list to map hidden fields in Elementor Form

You can't map your form field to a hidden field in Elementor...

The screenshot shows the 'Field Mapping' section of the Elementor Form editor. It lists several form fields on the left and their corresponding ActiveCampaign field mappings on the right. The fields are: Email*, First Name, Last Name, Phone, Organization name, and Tags. Each of these fields has a dropdown menu next to it, all of which are currently set to '- None -'. The Tags field has a text input box instead of a dropdown. Below the Tags field, there is a note: 'Add as many tags as you want, comma separated.'

You can resolve this in two ways

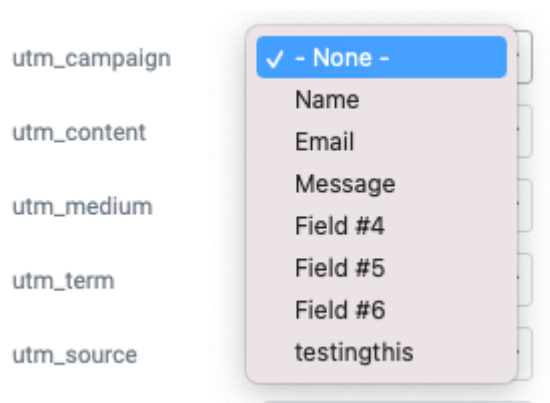

1. change all the custom parameters from ActiveCampaign to text from hidden. They will immediately will be mappable.
2. edit elementor code (single line edit) `wp-content/plugins/elementor-pro/modules/forms/classes/activecampaign-handler.php:131`. Add `hidden => 'text'` as shown in the image.

```

117
118     private function normalize_type( $type ) {
119         static $types = [
120             'text' => 'text',
121             'number' => 'number',
122             'address' => 'text',
123             'phone' => 'text',
124             'date' => 'text',
125             'url' => 'url',
126             'imageurl' => 'url',
127             'radio' => 'radio',
128             'dropdown' => 'select',
129             'birthday' => 'text',
130             'zip' => 'text',
131             'hidden' => 'text'
132         ];
133

```

After you are done either of those, you will be able to map the fields just fine (see the image)...
