

JotForm UTM tracking via iframe embed

HandL UTM Grabber V3 integrates with JotForm very easily.

After defining the variables in the form similar to the one below picture.

The screenshot displays the JotForm Form Builder interface. The top navigation bar includes the JotForm logo, 'Form Builder', and tabs for 'BUILD', 'SETTINGS', and 'PUBLISH'. The 'BUILD' tab is active. On the left, a sidebar lists 'Form Elements' categorized into 'BASIC', 'PAYMENTS', and 'WIDGETS'. The 'BASIC' category is selected, showing various form elements like Header, Full Name, Email, Address, Phone, Date Picker, Appointment, Signature, Fill in the Blank, Product List, Short Text, Long Text, Paragraph, Dropdown, Single Choice, and Multiple Choice. The main workspace shows a form titled 'Form' with a header, an email field, and three text input fields. The first text input field is highlighted with a blue border and contains the text 'Type a question'. The second text input field contains the text 'Type a question'. The third text input field contains the text 'Type a question'. A green 'Submit' button is at the bottom. On the right, a 'Field Details' panel is visible, showing the 'UNIQUE NAME' field with the value '{ utm_campaign|'. Below this, it states 'The field can be used to pre-populate fields from'.

Copy paste the embed code from JotForm to your WordPress

It will be something like this: simply copy and paste this into your WordPress editor or page builder.

```
<iframe id="JotFormIFrame-YOURJOTFORMID" title="Form" onload="window.parent.scrollTo(0,0)"
allowtransparency="true" allow="geolocation; microphone; camera; fullscreen"
src="https://form.jotform.com/202977053711051" frameborder="0" style="min-width:100%;max-
width:100%;height:539px;border:none;" scrolling="no" > </iframe> <script
src='https://form.jotform.com/s/umd/latest/for-form-embed-handler.js'></script>
<script>window.jotformEmbedHandler("iframe[id='JotFormIFrame-YOURJOTFORMID'",
"https://form.jotform.com/")</script>
```

After this code, copy and paste the code below. Ensure you replace `YOURJOTFORMID` with your form ID (as shown above).

```
<script>
setTimeout(() => {
  if (typeof(utms_js) == 'object'){
    var ifr =
document.querySelector("iframe[id='JotFormIFrame-YOURJOTFORMID'")
    var iframeParams = [];
    iframeParams.push( jQuery.param(utms_js) )
    var src = ifr.src;
    ifr.src = src + "?" + iframeParams.join('&');
  }
}, "500");
</script>
```
