

Tracking UTMs in Logiform for embedded

Create custom text fields and make them hidden.

Here we show it for `utm_campaign`. However, you can track any parameters listed here [Native WP Shortcodes](#)

Integration Wizard: Test

Embedded Code
Copy the HTML below to anywhere on your website

Embedding Code

Use CTRL + C to copy and then paste this code onto any page of your website

```
<!-- logiforms.com integration code - copy and paste anywhere on your page -->
<script type="text/javascript">
var formscript = '//cdn.logiforms.com/v3/build/ext/formProxy-min.js';
var head= document.getElementsByTagName('head')[0];
var script= document.createElement('script');
script.type = 'text/javascript';
script.src = formscript;

```

Preview Add URL Params

Copy and paste (Use CTRL+C to copy) the code above onto any page of your website. Any values passed through the URL to the page hosting this code will be passed through to the form. You can also define static values that get passed into the form by clicking the Add URL Params button

Need Help? Save Profile Previous Close Cancel

Before we place the code into our website, we'll make one modification in the embed code. It is the `params` field, please see it below.

```
params[[]]: decodeURIComponent(jQuery.param(handl_utm)),
```

```
<!-- logiforms.com integration code - copy and paste anywhere on your page --><script
type="text/javascript">var formscript = '//cdn.logiforms.com/v3/build/ext/formProxy-min.js';
var head= document.getElementsByTagName('head')[0];var script=
document.createElement('script');
script.type = 'text/javascript';
script.src = formscript;
head.appendChild(script);
window.formproxyS2=true;
window.addForm = function(){
  FormProxy = new FormProxy({
    // user editable
    resizeOnDemand: true,
```

```

        scrollTop                : true,
        height[[]]: 500,
        width[[]]: '100%',
        scrolling[[]]: 'no',
        marginWidth[[]]: 0,
        marginHeight[[]]: 0,
        frameborder[[]]: 0,
        vspace[[]]: 2,
        hspace[[]]: 2,
        params[[]]: decodeURIComponent(jQuery.param(handl_utm)),
        // system properties
        cookieRedirect            : false,
        formviewid                : 0,
        hid[[]]: 393948,
        fid[[]]: 86172,
        eid[[]]: 80784,
        eid2[[]]: 21,
        secureform[[]]: 0,
        rootformurl[[]]: 'https://forms.logiforms.com/',
        mode[[]]: 'standard',
        target[[]]: 'lfform-placeholder'
    });
}
</script>
<div id="lfform-placeholder"></div>
<!-- end logiforms.com integration code -->

```

Embed the code in your WP

After you embed, it will look like this

Logiforms

Appointment Scheduling

Please complete the following form to book your next appointment.

[Reset](#)

Now you can test it...

If everything went well, you should see the UTMs, traffic source and all the other parameters in the backend.
