MailChimp for WordPress Integration

1-)Go to "fields and MERGE tags" from setting on Mailchimp

The screenshot shows the Mailchimp Audience dashboard for an audience named "HandL". The left sidebar contains navigation links: Audience, Audience dashboard, All contacts, Signup forms, Tags, Segments, Surveys, Preferences center, and Inbox. The main content area has a header with "Audience" and "HandL", followed by the text "Your audience has 2 contacts. 2 of these are subscribers." Below this is a navigation bar with tabs: Overview, Manage contacts (selected), Add contacts, Signup forms, Preferences center, Settings (selected), Inbox, and Surveys. A dropdown menu is open under the "Settings" tab, showing options: Audience name and defaults, GDPR fields and settings, Publicity settings, and Audience fields and *|MERGE|* tags (highlighted with a red box). A red arrow points from the "Settings" tab to this option. On the right side of the dashboard, there are buttons for "Export Audience" and "Email Marketing".

2-)Click on the "Add A Field" button

Audience fields and *|MERGE|* tags

Here you can manage the fields available to your audience's [signup forms](#). Groups can also show up on signup forms but are edited on the audience's [groups](#) page.

8-)Paste your form shortcode here

9-)Go to campaign URL builder and copy the URL that it generated

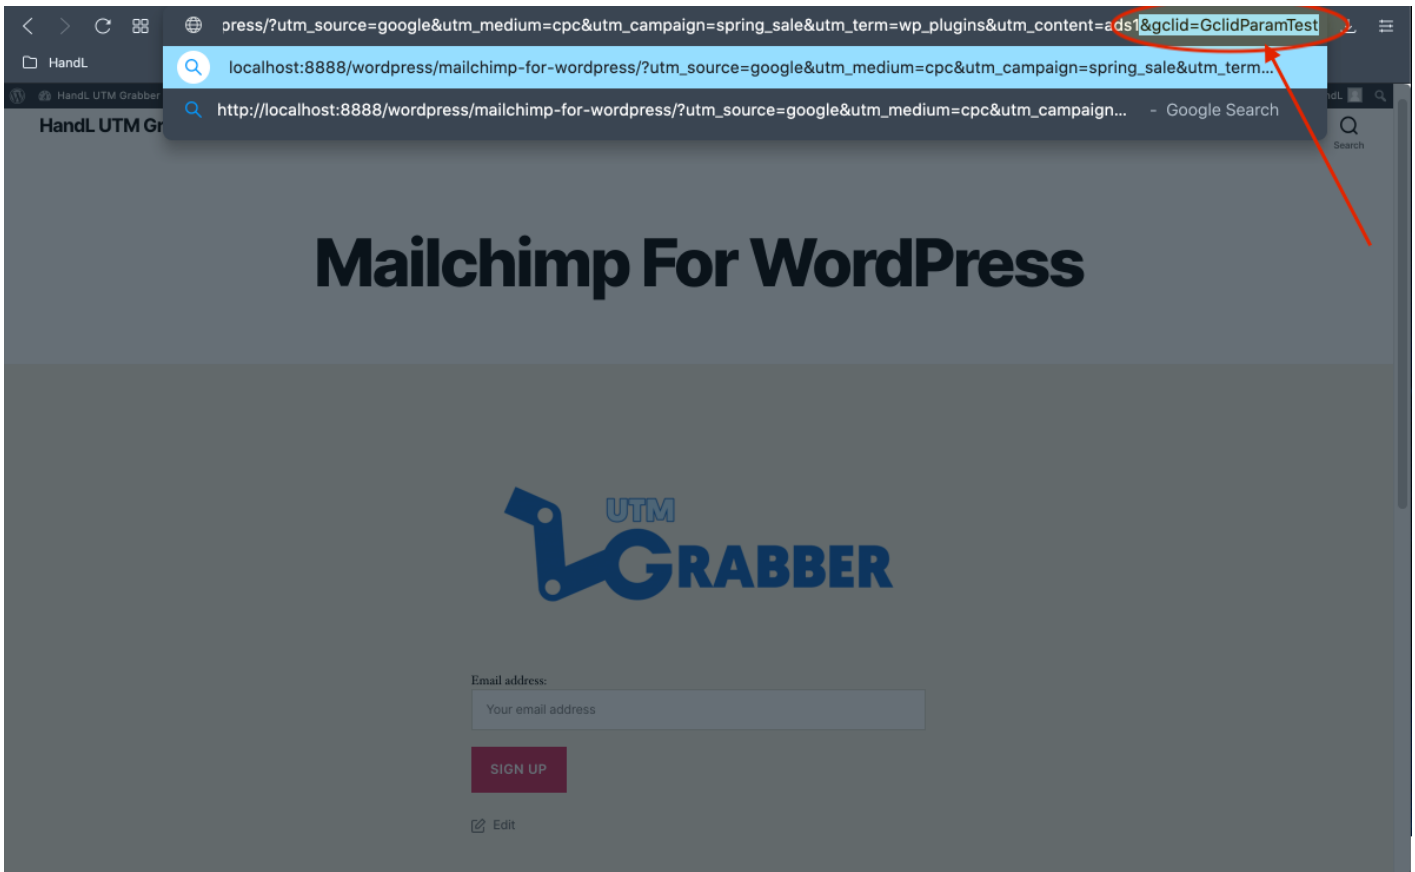

10-)Paste the URL that you copied

The screenshot shows a web browser window with the address bar containing the URL: `-wordpress/?utm_source=google&utm_medium=cpc&utm_campaign=spring_sale&utm_term=wp_plugins&utm_content=ads1`. The page title is "Mailchimp For WordPress". The main content area features the "UTM GRABBER" logo, which consists of a blue stylized robot head and the text "UTM GRABBER". Below the logo is a sign-up form with the label "Email address:", a text input field containing the placeholder "Your email address", and a red "SIGN UP" button. At the bottom of the form is a small "Edit" link with a pencil icon.

11-)Write the gclid parameter at the end of the URL Then send the form
