

# Collecting UTMs in Piotnet

Assign custom classes for each field as it is shown above. Here we show only for utm\_campaign, however this can be implemented for all the fields similarly.

Please see the list of parameters you can use here [Native WP Shortcodes](#)

The image shows a mobile application interface for 'Piotnet Forms'. At the top, there is a navigation bar with a back arrow, the title 'Piotnet Forms', and a grid icon. Below this is a menu with three options: 'Settings' (gear icon), 'Style' (pencil icon), and 'Advanced' (list icon), with 'Advanced' being the active tab. The 'Advanced' section is expanded, showing several settings:

- Margin:** Includes a 'PX' label, a row of four input fields for TOP, RIGHT, BOTTOM, and LEFT, and a link icon.
- Padding:** Includes a 'PX' label, a row of four input fields for TOP, RIGHT, BOTTOM, and LEFT, and a link icon.
- Box Shadow:** Includes a pencil icon.
- Custom ID:** An empty text input field.
- Custom Classes:** A text input field containing the value 'utm\_campaign'.

Below these settings are two more sections, 'Border' and 'Background', each with a dropdown arrow.
