

UTM Grabber for Real Cookie Banner

By default, UTM Grabber will collect the user data regardless of Real Cookie Banner consent decision.

If you want UTM Grabber to wait for the consent from Real Cookie Banner. Do the following:

Set UTM Grabber to recognize Real Cookie Banner

Go to UTM > GDPR

Check Real Cookie Banner (Free) box.

Create Consent for UTM Grabber in Real Cookie Banner

Go to Cookies > Services (Cookies)

Create UTM Grabber Cookies and assign it to any group.

Here we created for Essential group

General service configuration [Learn more](#)

* Name:

UTM Grabber

Each service used should have a descriptive name that is understandable to a non-professional user. Example: "Google Analytics".

* Status:

EnabledDisabledDraft

Services with the status "Draft" or "Disabled" are not visible to the public. In addition, a draft will be highlighted in the service table so that you do not forget to configure it.

* Group:

Essential

Each service must be assigned to a group. All services that do not belong to the group of essential services can (but do not have to) be accepted by visitors. According to the ePrivacy Directive, only services without which the website would not work are considered as essential services if the visitor has explicitly requested the service used. A possible economic interest of the website operator in using a tool, e.g. Google Analytics, is irrelevant.

* Provider:

HandL Digital LLC

A service always has an "owner", who processes collected data or information saved in cookies etc. Please specify which provider creates cookies and processes personal data, e.g. "Google Ireland Limited". If you are the provider, please enter your legal name.

Purpose:

The ePrivacy Directive and the GDPR require that a non-professional user understands the purpose of this service, how personal data is collected and how cookies are used for this purpose.

* Privacy policy of the provider:

https://utmgrabber.com/

Provide a direct link to the privacy policy of the provider that runs this service (in the language of your website).

* Legal basis:

Consent (Opt-in)Legitimate interest (Opt-out)

[Learn more](#)

Services can be used on various legal bases according to [Art. 6 GDPR](#). "Consent" means that the user must explicitly agree to the service (opt-in). "Legitimate interest" means that your interest as a website operator prevails to use the service and the user must explicitly disagree (opt-out). Unless it is an essential service. Then an objection is not possible. A legitimate interest exists only in rare cases and only for data processing. If you are not sure, it is better to obtain consent to be on the safe side.

Your service is currently grouped as "Essential". This group implies the legitimate interest, with the only difference that this service cannot be opted out.

☐

This service does not set any technical cookies on the client of the visitor, but e.g. integrates a script.

Make sure the Cookie name is set as "UTM Grabber"

Real Cookie Banner

Compliance with a legal obligation

Created from template

Real Cookie Banner asks website visitors for consent to set cookies and process personal data. For this purpose, a UUID (pseudonymous identification of the user) is assigned to each website visitor, which is valid until the cookie expires to store the consent. Cookies are used to test whether cookies can be set, to store reference to documented consent, to store which services from which service groups the visitor has consented to, and, if consent is obtained under the Transparency & Consent Framework (TCF), to store consent in TCF partners, purposes, special...

EditDelete

Voila! Your set up is done. UTM Grabber now will wait the consent before collecting data.
