# Spiffy Checkout Integration

Spiffy Checkout integration is very easy.

As long as you can pass UTMs to the checkout URL, Spiffy can take them and record automatically as it is explained here <https://help.spiffy.co/article/251-adding-utm-parameters>.

So how can you append all the UTM variables to checkout URL.

It is very easy, simply create your anchor link and add `utm-out` class variable.

```
<a href="https://domain.spiffy.co/checkout/test" class="utm-out" />
```

You can view the UTMs in the Spiffy.

The screenshot displays a list of user and campaign data. It starts with a Chrome icon, followed by an Apple icon for OS X 10.15.7, a link icon for 'Linked' with an external link symbol, and a target icon for the IP address 151.210.164.86. Below these, a link icon precedes the text 'Campaign: 123'. Underneath the campaign information, the source 'Source: google', medium 'Medium: cpc', content 'Content: content', and term 'Term: term' are listed.

-  Chrome
-  OS X 10.15.7
-  Linked 
-  151.210.164.86
-  **Campaign: 123**
- Source: google**
- Medium: cpc**
- Content: content**
- Term: term**

You can pass UTMs using the integrations as well such as Zapier.
