

Spiffy Checkout Integration

Spiffy Checkout integration is very easy.

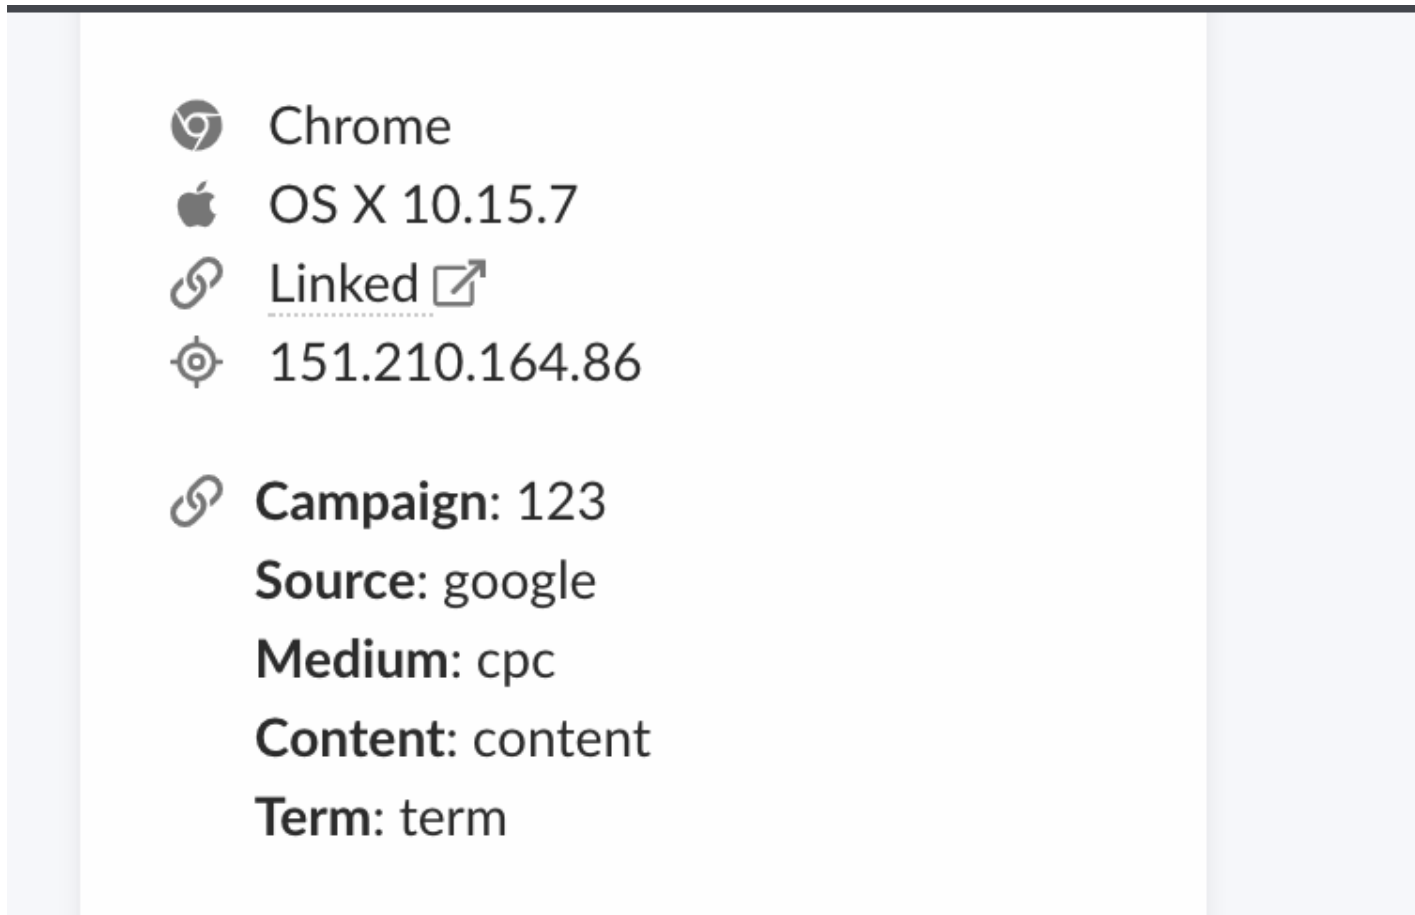

As long as you can pass UTMs to the checkout URL, Spiffy can take them and record automatically as it is explained here <https://help.spiffy.co/article/251-adding-utm-parameters>.

So how can you append all the UTM variables to checkout URL.

It is very easy, simply create your anchor link and add `utm-out` class variable.

```
<a href="https://domain.spiffy.co/checkout/test" class="utm-out" />
```

You can view the UTMs in the Spiffy.

The screenshot shows a list of UTM variables and their values, each preceded by an icon: a Chrome logo for 'Chrome', an Apple logo for 'OS X 10.15.7', a link icon for 'Linked' (with a small square icon to its right), a target icon for '151.210.164.86', and a link icon for 'Campaign: 123'. Below these, the following variables are listed without icons: 'Source: google', 'Medium: cpc', 'Content: content', and 'Term: term'.

- Chrome
- OS X 10.15.7
- Linked 
- 151.210.164.86
- Campaign: 123
- Source: google
- Medium: cpc
- Content: content
- Term: term

You can pass UTMs using the integrations as well such as Zapier.
