

UTM Tracking in TypeBot

First, define the UTM parameters you wish to gather within TypeBot as illustrated below.

Once you have completed the flow, select the iframe and copy and paste it into your website.

Add my domain [Add](#)

Embed your typebot

WhatsApp [Add](#)

Wordpress

Shopify

Wix

Google Tag Manager

HTML & Javascript

React

Nextjs

API

Notion

Webflow

FlutterFlow

Script

Iframe

The code will appear as follows:

```
<iframe
  src="https://viewer.typebot.io/lead-generation-onv5nse" style="border: none; width=100%;
height=600px"
```

```
></iframe>
```

Add a class variable to the code as shown below:

```
<iframe class="utm-src"
  src="https://viewer.typebot.io/lead-generation-onv5nse" style="border: none; width=100%;
height=600px"
></iframe>
```

That's it!

UTMs will be compiled as users navigate through your flow.
