

TypeForm integration - Preferred (Advanced)

Enable UTM Tracking in Typeform

Create custom fields in typeform
(Optional - only if you'd like to capture more than utm e.g. handl_url)

You can create the custom fields following the documentation [here](#)

```
<div id="handl-form-wrapper"></div><script src="//embed.typeform.com/next/embed.js"></script>
<link rel="stylesheet" href="//embed.typeform.com/next/css/popup.css" />
<script>
  window.tf.createWidget('<form-id>',{ container: document.getElementById('handl-form-
wrapper'),
  hidden: {
    utm_campaign: Cookies.get("utm_campaign"),    utm_source: Cookies.get("utm_source"),
    utm_medium: Cookies.get("utm_medium"),
    utm_content: Cookies.get("utm_content"),
    utm_term: Cookies.get("utm_term"),
    handl_url: Cookies.get("handl_url"),
  },
  iframeProps: {
    height: 600,
    width: 800,
  }
  })
</script>
```

How to get form id of your form?

You can find from the public URL of your form:

<https://form.typeform.com/to/> Or from admin panel URL:

https://admin.typeform.com/form/*
