

# Wpforms Integration

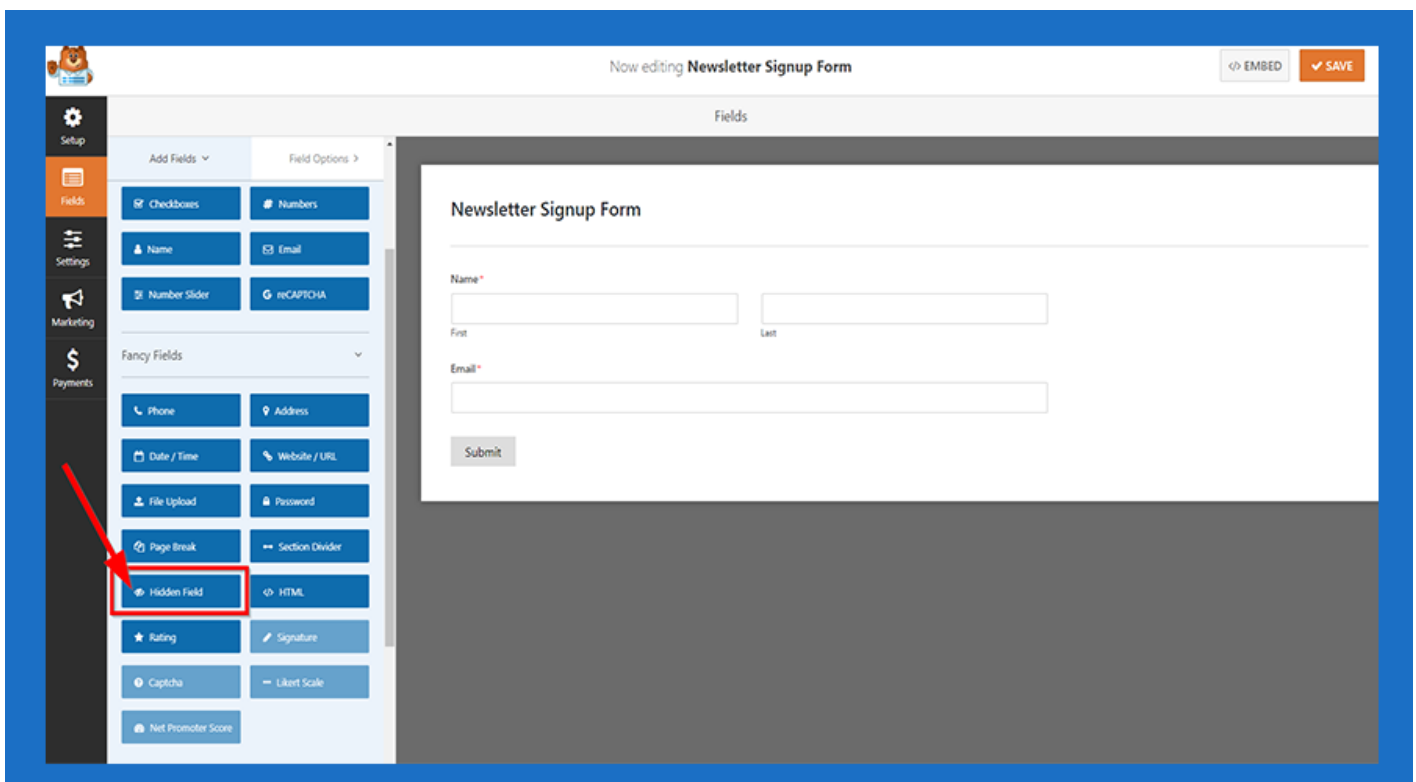

**1. Select WPForms from the left manu and then click 'Add New'**

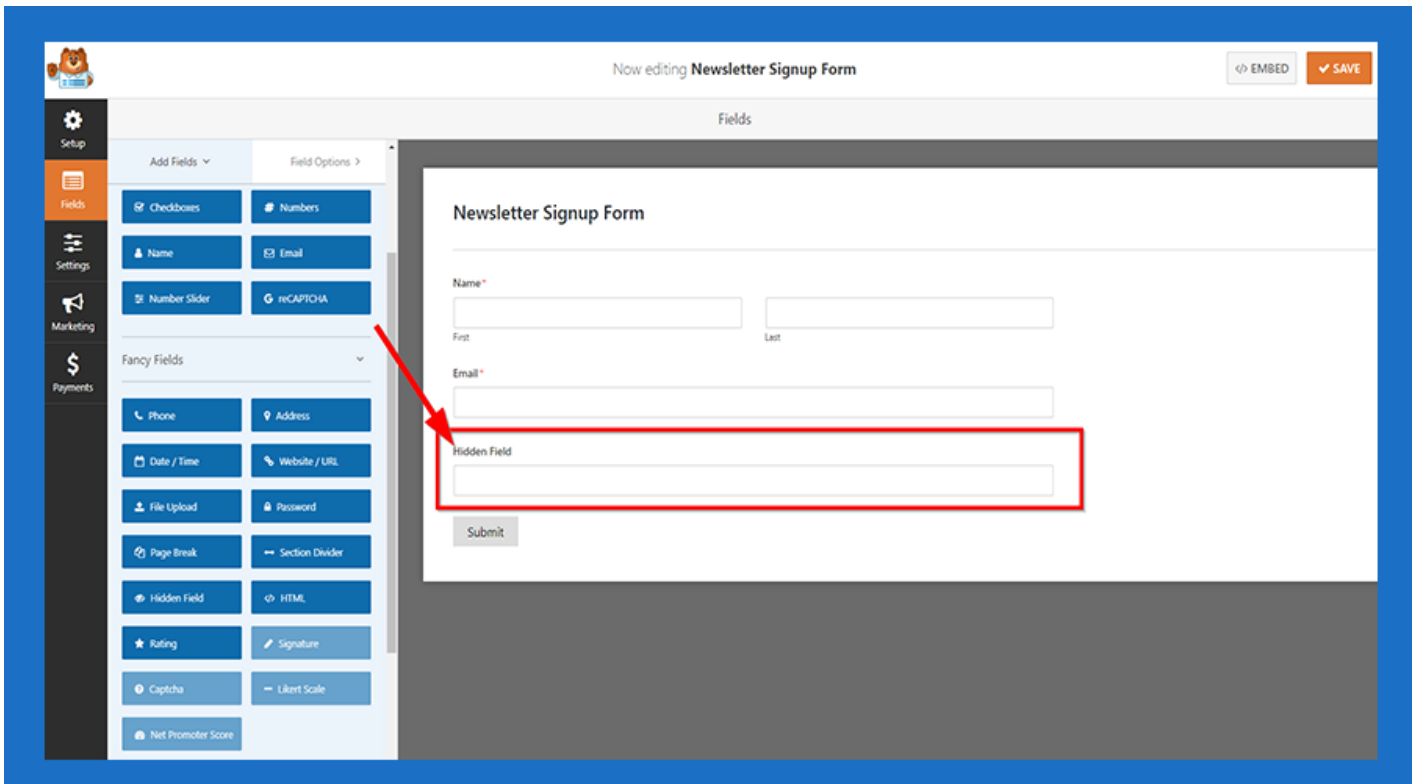

**2. Click 'Newsletter Sign Up Form'**

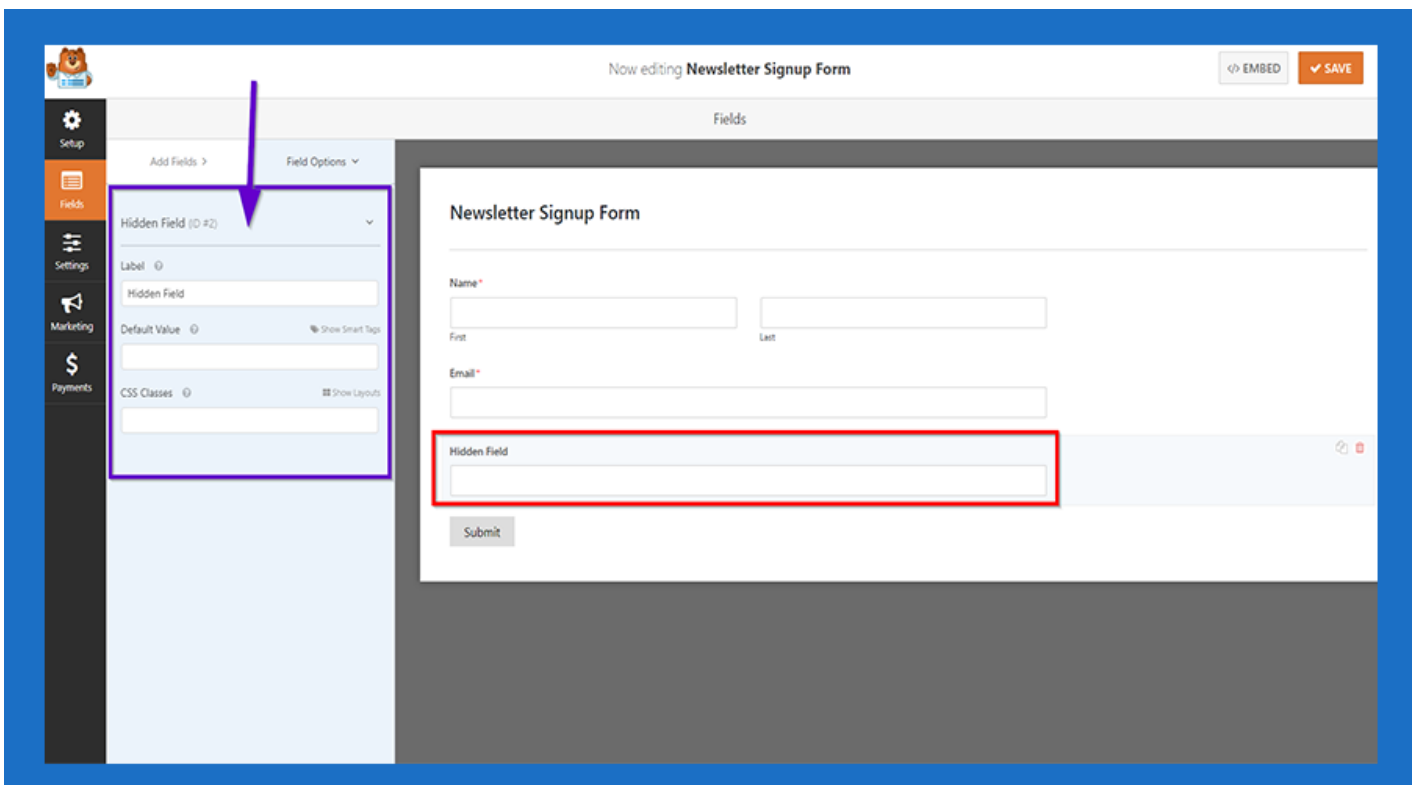

### 3. Click 'Hidden Field' Button

### 4. Hidden Field shows at the bottom of the form

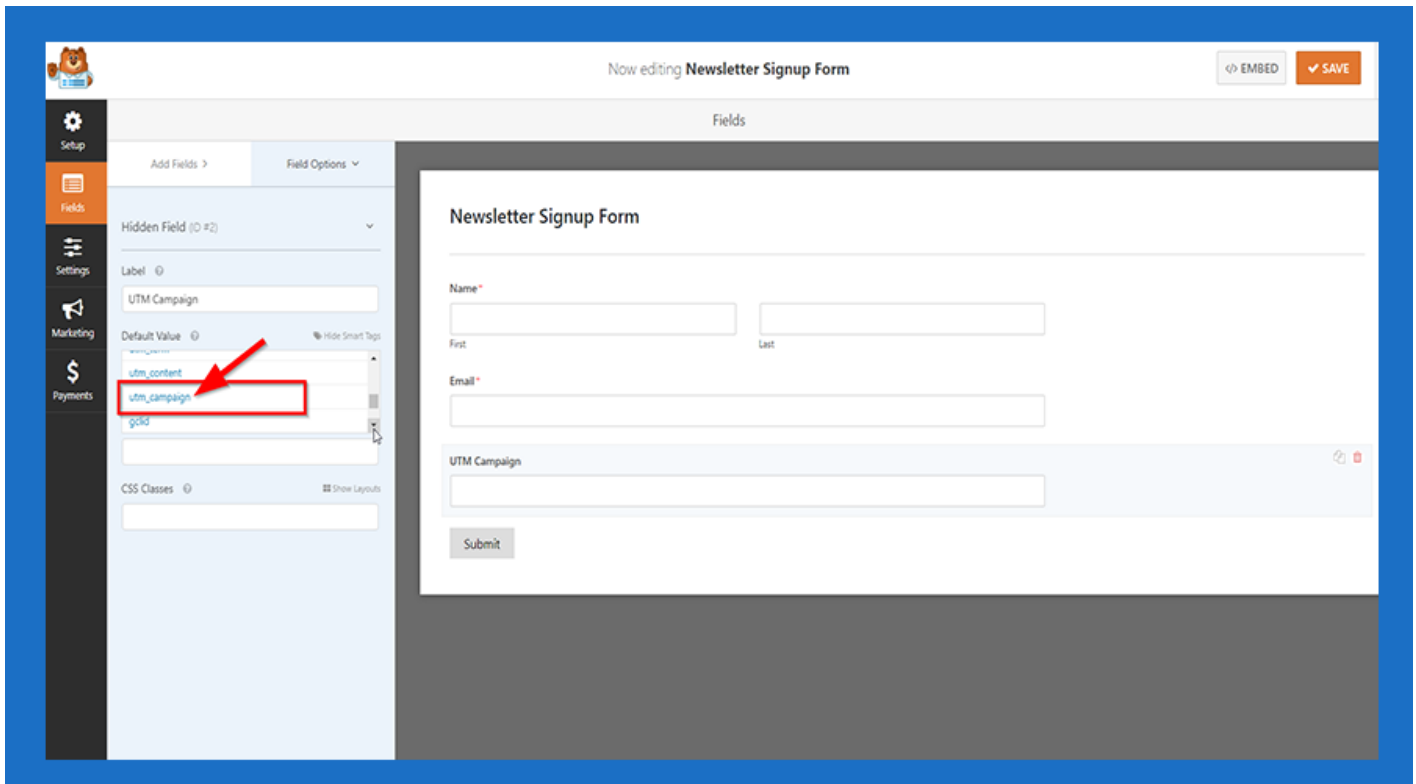

**5. Click 'Hidden Field' and then a menu shows at the left side the form**

## 6. Give a name for your Hidden Field and then Click the 'Show Smart Tag'

The screenshot shows the 'Newsletter Signup Form' editor interface. On the left, a sidebar contains navigation icons for Setup, Fields, Settings, Marketing, and Payments. The 'Fields' tab is active, displaying a list of fields under the heading 'Hidden Field (ID #2)'. The first field is 'Label' with a value of 'UTM Campaign'. A red box highlights the 'Label' field, and a purple arrow points to the 'Show Smart Tag' button next to it. Below the 'Label' field are sections for 'Default Value' and 'CSS Classes'. The main area on the right shows the form layout with fields for 'Name' (First and Last), 'Email', and 'UTM Campaign'. A 'Submit' button is at the bottom. The top of the editor shows 'Now editing Newsletter Signup Form' and buttons for 'EMBED' and 'SAVE'.

## 7. Scroll Down the menu and choose your value from the list

## 7.5.Add Class Variable After The Name

If you are adding utm\_campaign, add the class variable as utm\_campaign as well. This will enable client-side tracking to function properly, which is particularly helpful if caching is enabled on your site.
